Stage/Staff Gauge

Measuring Principle

A stage or staff gauge is common standard equipment for surface water level measurements. Stage gauge are visual indicators to determine the surface water level and are implemented in rivers, channels, reservoirs and dams.

Feature

- Time proven basic visual reference for water level measurement
- Easy to see and read
- Available in many standard sizes
- Custom scales, sizes and colors available
- Rugged and durable weather resistant design

Application

- Rivers, lakes, streams, dams & reservoirs
 - Wastewater treatment plants
 - Flumes and weirs
 - Visual flow measurement
 - Tank
